

## **Government Institute of Forensic Science, Nagpur**

### **Program outcome:**

Forensic science is a rewarding career where the love of science can be applied to the good of society, public health, and safety.

The rapidly changing scenario of modern day world is marred by several crimes and the ever improving criminals. It is implicit to counter each improvisation made by the criminals by one of our own, so that the guilty may be punished and the innocent may be protected. Also, prevention of crime or as we have come to know it “Preventive Forensics” is also playing a pivotal role in crime prevention.

Realizing the full potential of forensic science and crime scene investigation, law enforcement agencies and several govt. owned and private forensic labs have come up. Presently, in India there are seven Central Forensic Science Laboratories along with a number of State, Regional, District and Mobile FSLs. At this time, there is an acute shortage of trained and learned forensic scientists and experts in the country. Opportunities exist in government organizations such as the Forensic Science Laboratories, Intelligence Bureau (IB), the Central Bureau of Investigation (CBI), the CID, the crime cells of state police forces as well as in large private detective agencies and laboratories among others. **Government Institute of Forensic Science, Nagpur** is playing a leading role in nurturing young minds in this field of interest so as to create professionals in forensic science. We offer exciting opportunities to the students who are interested in opting for a challenging career in the field, leading to the award of **B.Sc. Forensic science Degree, M.Sc. Forensic Science Degree, P.G. Diploma in Forensic Science and Related Law (PGDF) and P.G. Diploma in Digital and Cyber forensic and Related law (PGDC)**.

Which on completion will be professionals to police agencies, doctors, detectives, lawyers, judges and often provide expert testimony during trials in the Hon'ble Courts. The courses are aimed at creating informed citizenry as well as a workforce that would be able to stand up to the ever rising stature of crime and criminals in the society. Our comprehensive syllabi, practical oriented & skill based teaching-learning (would) enable(s) our students to be useful and ready (for) to the investigation agencies (Police, CID, CBI, etc.); to the Forensic

Science Laboratories (District, Regional, State & Mobile units); to colleges &/or institutions (as qualified teachers for the subject i.e. Forensic Science); various laboratories (undertaking quality control, quality assurance, analytical work, research, etc.); as forensic experts (to give 'expert witness' as an aid to the court & lawyers as amicus curiae, etc.) to name a few!.

In addition to this the students will develop the qualities such as logical and critical thinking of the problems. The participation of students in various extracurricular and extension activities will lead to develop the multifaceted personality which will be observed in his effective communication and social interactions. The students will also developed qualities such as ethical behavior , integrity , self learner etc. In summary this will help him in his life to become a good citizen and will be asset to the country
